Summary

Senior Android Developer with a strong track record of building scalable mobile platforms used by hundreds of thousands of users. Led a design system migration across 4 apps, 6 teams, and 16+ developers, improving development efficiency by ~50% and enabling consistent, high-quality user experiences. Experienced in Kotlin, Jetpack Compose, and modern Android architecture, with a strong focus on ownership, reliability, and enabling teams to deliver faster.

Experience

ParshipMeet Group

Sep 2023 – Oct 2025

Android Developer · Dresden, Germany (Remote)

- Led design system migration across Lovoo, MeetMe, Skout, and Tagged — 4 apps serving 4.3M+ daily active users — aligning 6 teams and 16+ Android developers.
- Improved feature delivery speed by ~50% measured by sprint velocity, through centralized UI components and design tokens adopted across all 4 apps.
- Established UI standards via documentation, conventions, and reusable components, reducing inconsistencies and production issues.
- Led component adoption across teams, ensuring long-term maintainability.
- Introduced Clean Architecture principles, supporting modular and scalable codebase evolution.
- Acted as the go-to design system expert across teams, supporting developers with adoption questions and onboarding new joiners, while monitoring production stability via Firebase.

Sixt

Nov 2022 – Apr 2023

Senior Android Developer (Contract) · Munich, Germany

- Delivered customer-facing features for the Rent product in a cross-functional agile team.
- Increased test coverage from below 40% to over 70% by driving unit testing practices.
- Accelerated UI development by introducing Jetpack Compose into the codebase.
- Refactored legacy components toward a modular Clean Architecture setup.
- Enabled data-driven decisions through A/B testing and feature rollouts.
- Collaborated with backend teams to improve API integration and release stability.

Cazoo

May 2022 – Aug 2022

Senior Android Developer · Munich, Germany

- Designed and maintained a car refurbishment tracking system supporting internal operations.
- Improved workflow responsiveness by ~30% using Kotlin Coroutines, Flow, and modular refactoring.
- Partnered with backend engineers on API and architecture design.
- Improved integration reliability and supported operational efficiency.

Freelancer & Career Break

Jan 2021 – May 2022

- Relocated from Iran to Germany — navigated an international move during COVID, maintained technical skills through freelance Android work, and actively improved English.

Bato

Aug 2018 – Jan 2021

Senior Android Developer · Tehran, Iran

- Built a Persian virtual assistant app used by 20,000+ users with 98% crash-free stability.
- Developed chatbot features for non-feature requests in collaboration with AI and backend teams.
- Improved UX and app performance through user behavior analysis and experimentation, contributing to ~20% higher user retention.
- Migrated architecture from MVC to MVVM, improving maintainability and scalability.

AdLif

Sep 2017 – Aug 2018

Android Developer · Tehran, Iran

- Built the Android platform powering a digital advertising network across 500 taxis in a single-city startup deployment, managing content delivery to in-vehicle tablets at fleet scale.
- Reduced internet usage by 50% through optimized video download, caching, and display algorithms.
- Built a custom Android launcher for kiosk-mode deployments, improving device control and operational reliability.

Yana Group

Jul 2011 – Mar 2015

Junior Android Developer · Ahvaz, Iran

- Developed internal Android apps for communication and content sharing.

Skills

Languages	Kotlin, Java
Android	Android SDK, Jetpack (ViewModel, Navigation), Jetpack Compose
Architecture	MVVM, MVI, Clean Architecture, Modularization
Concurrency & Data	Coroutines, Flow, Room, SQLite
Networking	Retrofit, OkHttp, REST APIs, gRPC, Protocol Buffers
DI	Hilt, Dagger, Koin
Testing	JUnit, Espresso, Robolectric
Experimentation	A/B Testing, Feature Flags
CI/CD & Tools	Git, Gradle, GitHub Actions, Bitrise, Firebase, Datadog

Education

Bachelor of Software Engineering

Institute for Higher Education ACECR Khouzestan

2010 – 2014

Languages

Persian (Native) — English (Fluent) — German (A1)
